

Template and Page creating task - 4

Created a component for the book details to get stored:

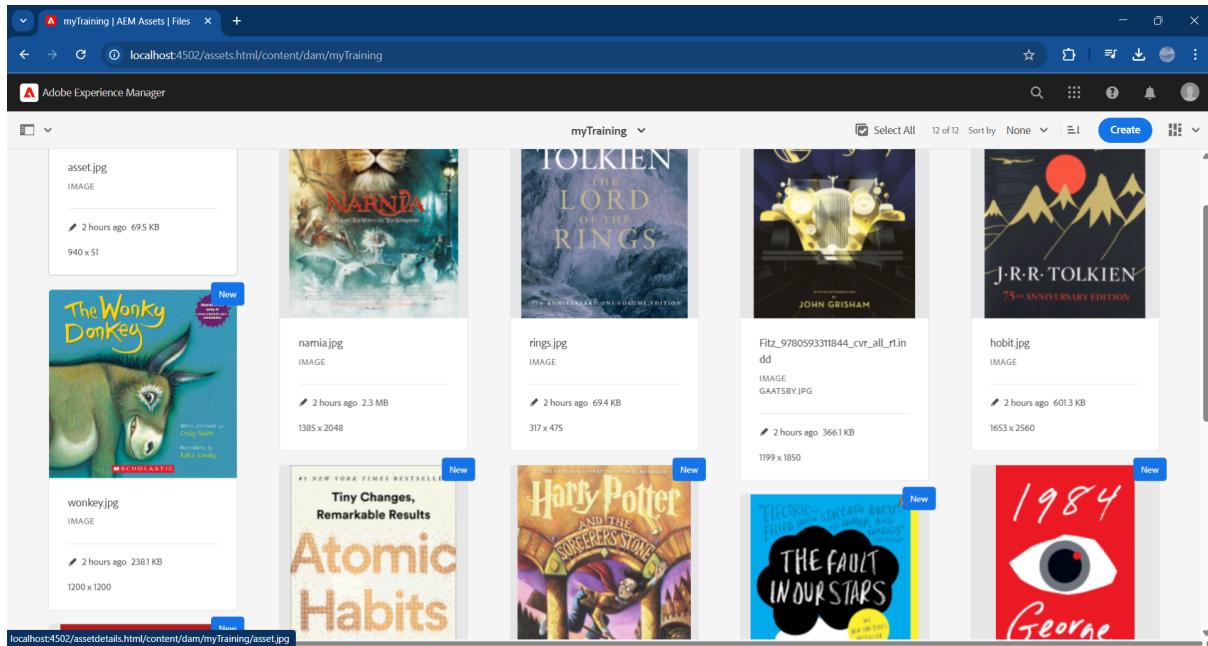

Designed how the bookDetails component should look:

The screenshot shows the CRXDE Lite interface with the file tree expanded. The path is /apps/myTraining/components/bookdetail/cq:dialog/content/items/column/items/coverImage. The main panel displays the 'bookdetail.html' file content, which contains CSS and HTML code for styling and displaying book details. Below the code, there is a 'Properties' tab showing the following configuration table:

Name	Type	Value	Protected	Mandatory	Multiple	Auto Created
jcr:primaryType	Name	nt.unstructured	true	true	false	true
required	Boolean	true	false	false	false	false
name	String	.coverimage	false	false	false	false
fieldLabel	String	Cover Image	false	false	false	false
sling:resourceType	String	granite/ui/components/coral/foundation/form/pathbrowser	false	false	false	false

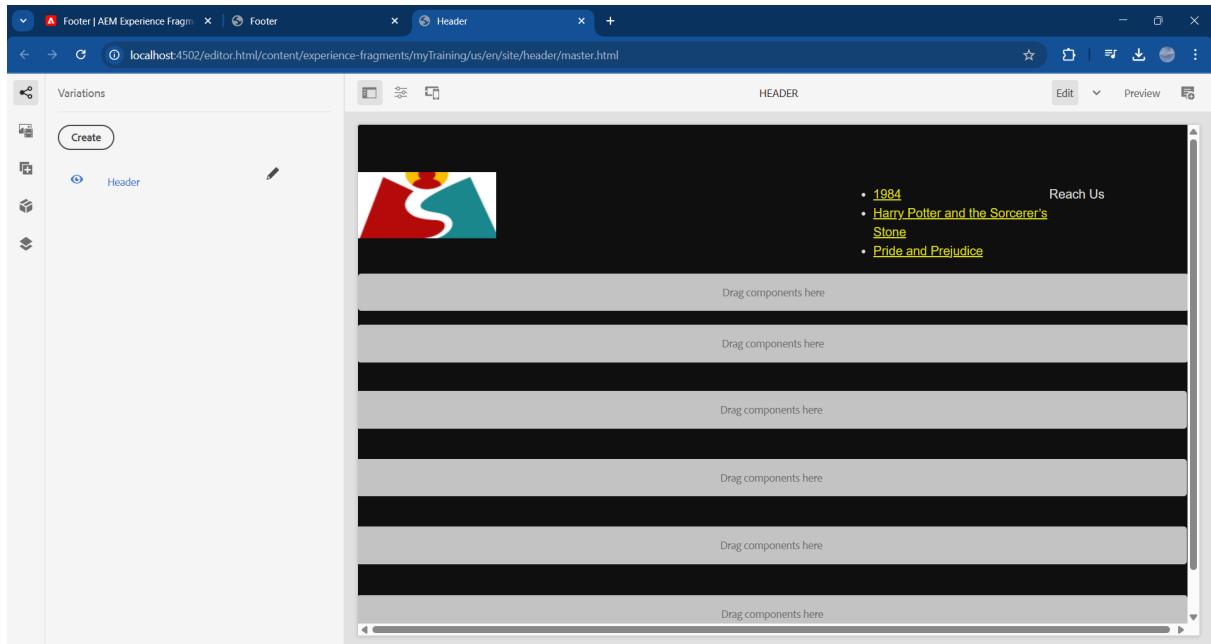

Stored all the images in content/dam/myTraining:

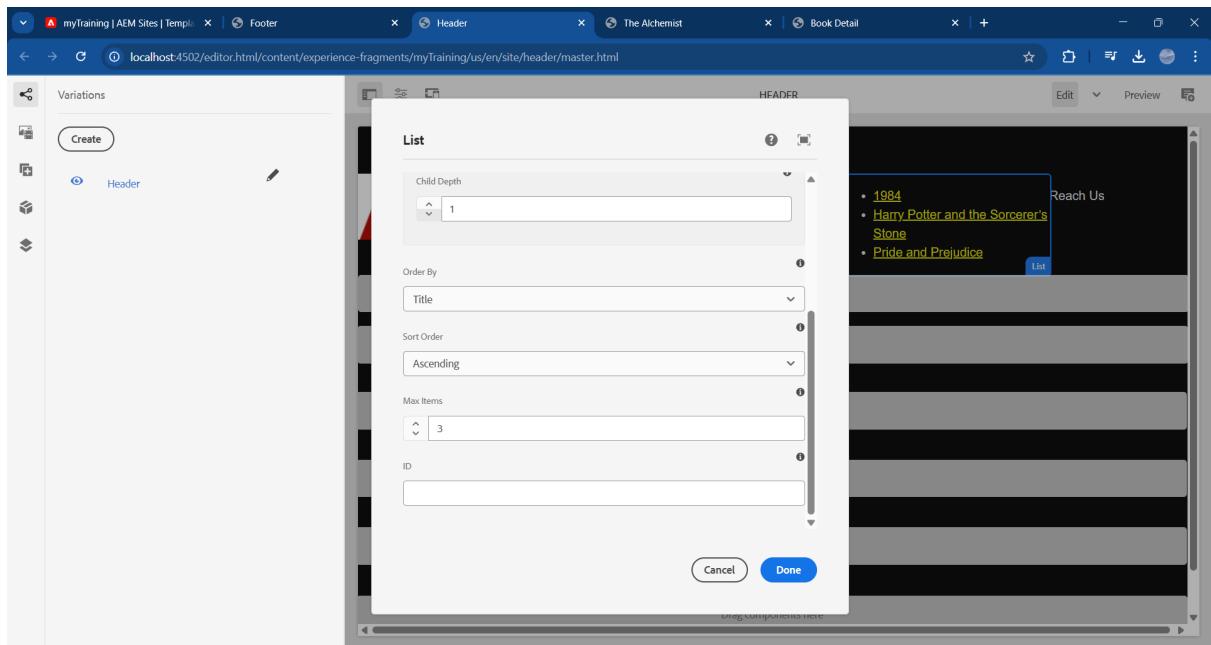

Created the footer inside the content fragment , used list and text components:

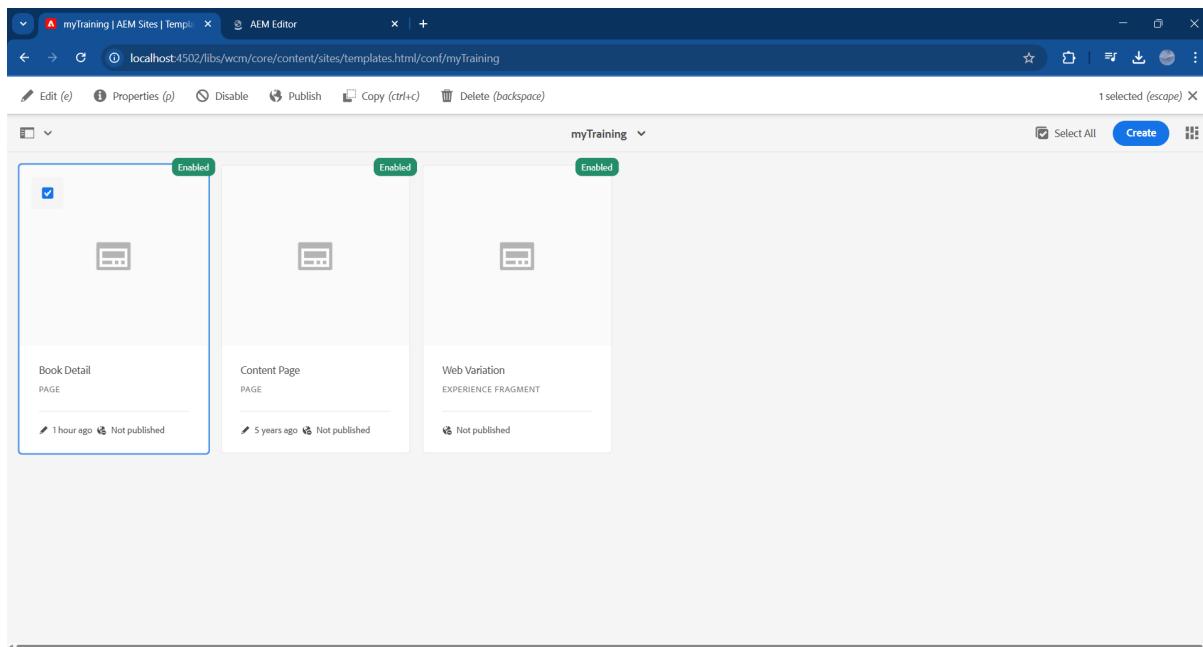

A screenshot of the AEM Experience Fragments editor showing a 'Footer' component. The component contains a list of books and some footer text. The list includes: The Alchemist, To Kill a Mockingbird, 1984, Harry Potter and the Sorcerer's Stone, The Great Gatsby, Pride and Prejudice, The Catcher in the Rye, The Hobbit, The Lord of the Rings: The Fellowship of the Ring, and The Chronicles of Narnia: The Lion, the Witch, and the Wardrobe. The footer text includes: 'We provide detailed book insights and reviews.', 'Email: contact@yourdomain.com', 'Phone: +123-456-7890', 'Follow Us: [Facebook] [Twitter] [Instagram]', and 'Copyrights 2025 Your Website. All Rights Reserved.'

Created the footer inside the content fragment , used list and text components:

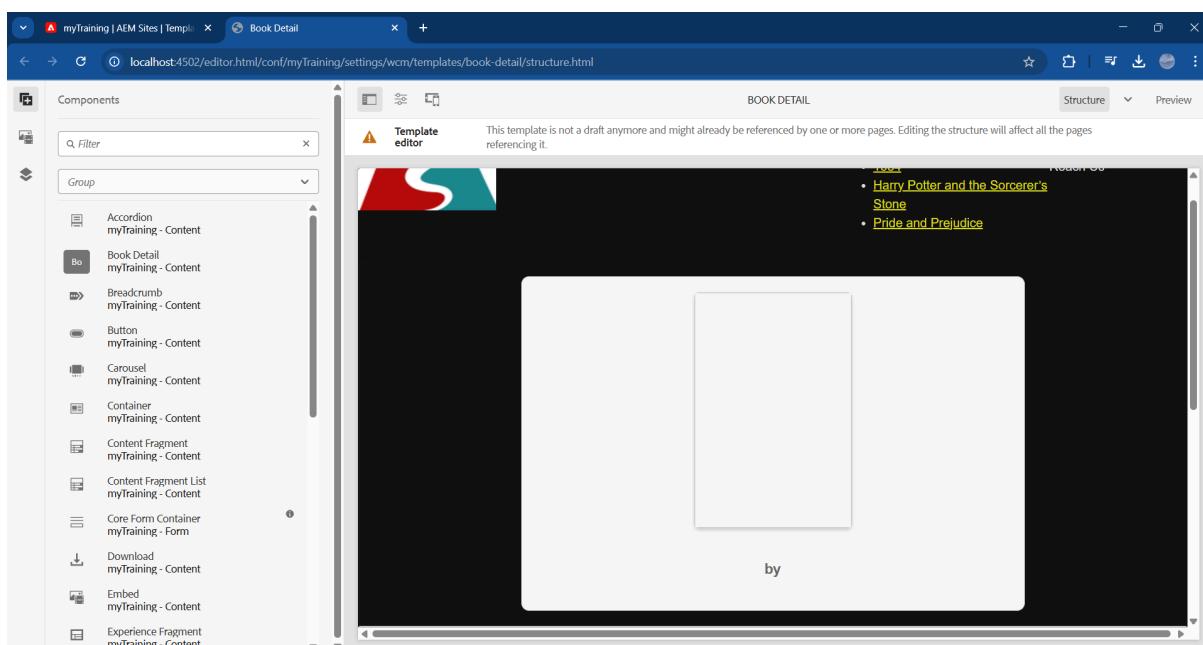

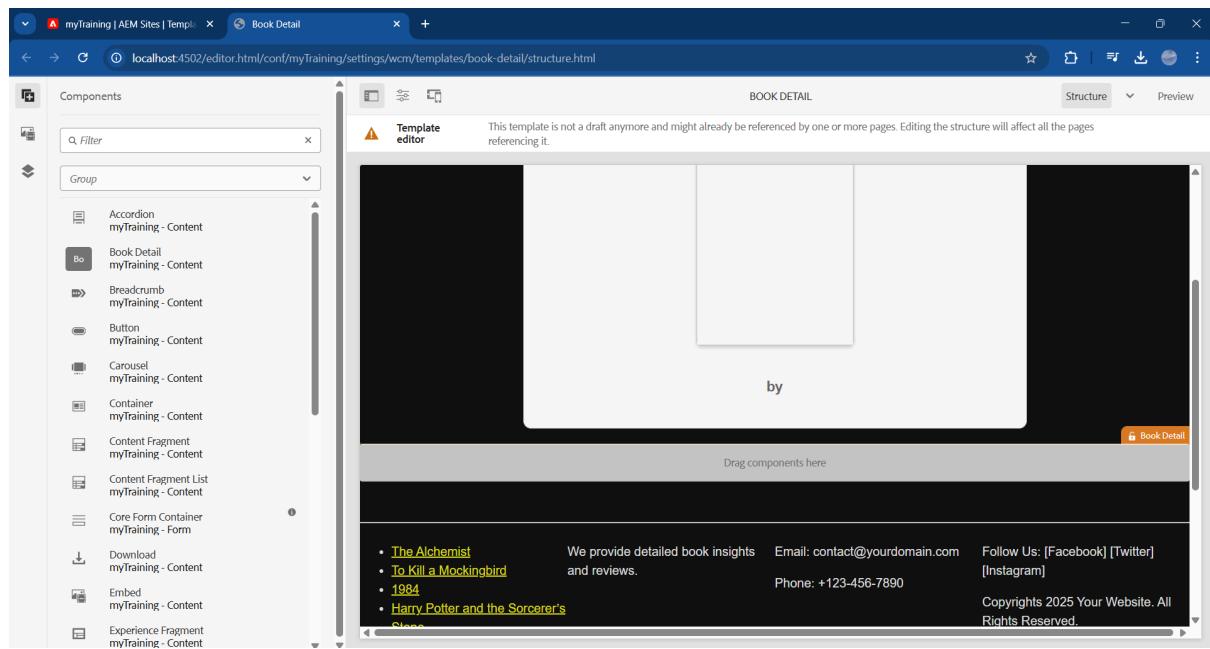

Gave the max list length to 3 as it looked bigger if we give all the 10 in the nav:

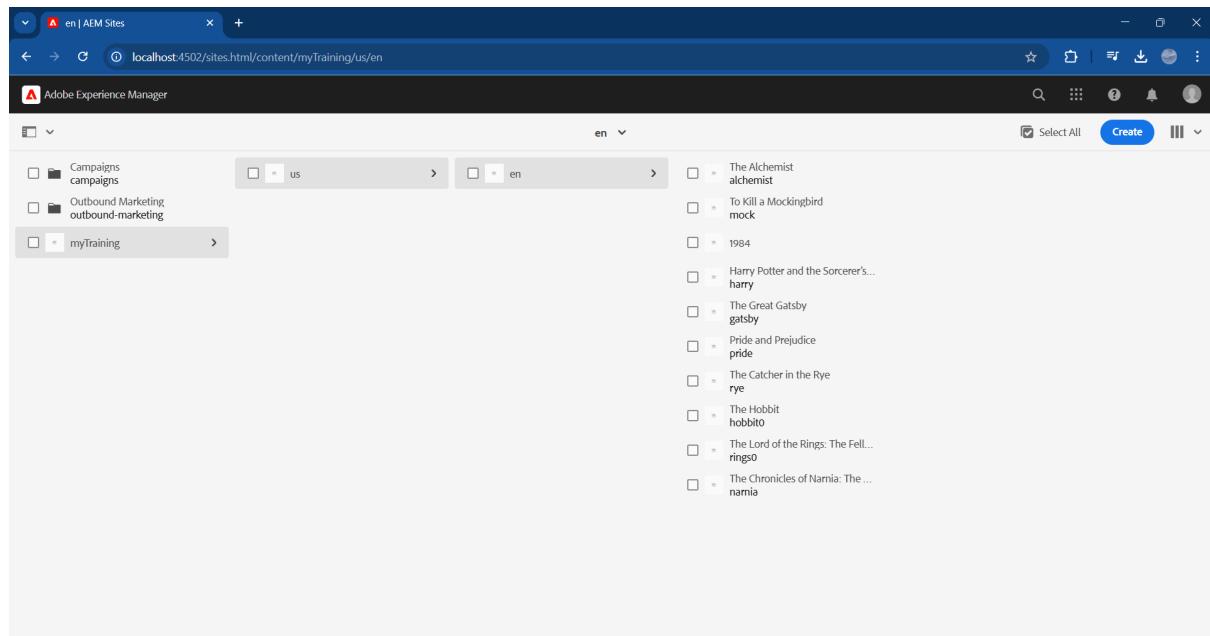

Created the template and used the book details component already created to create them and used the xf header and footer:

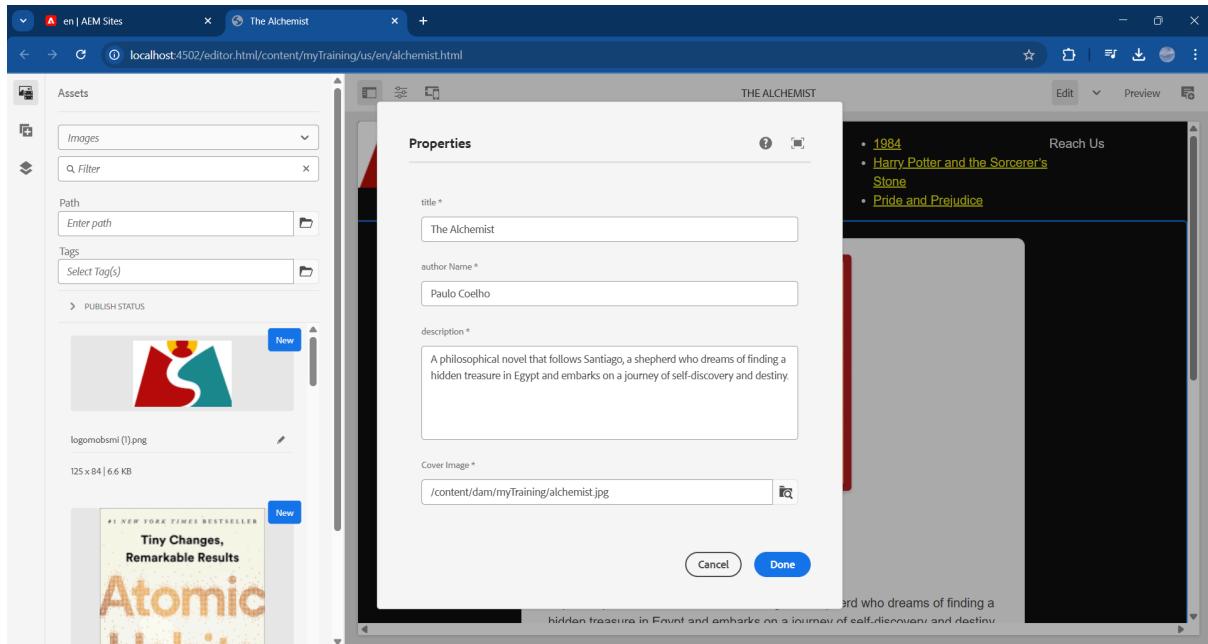

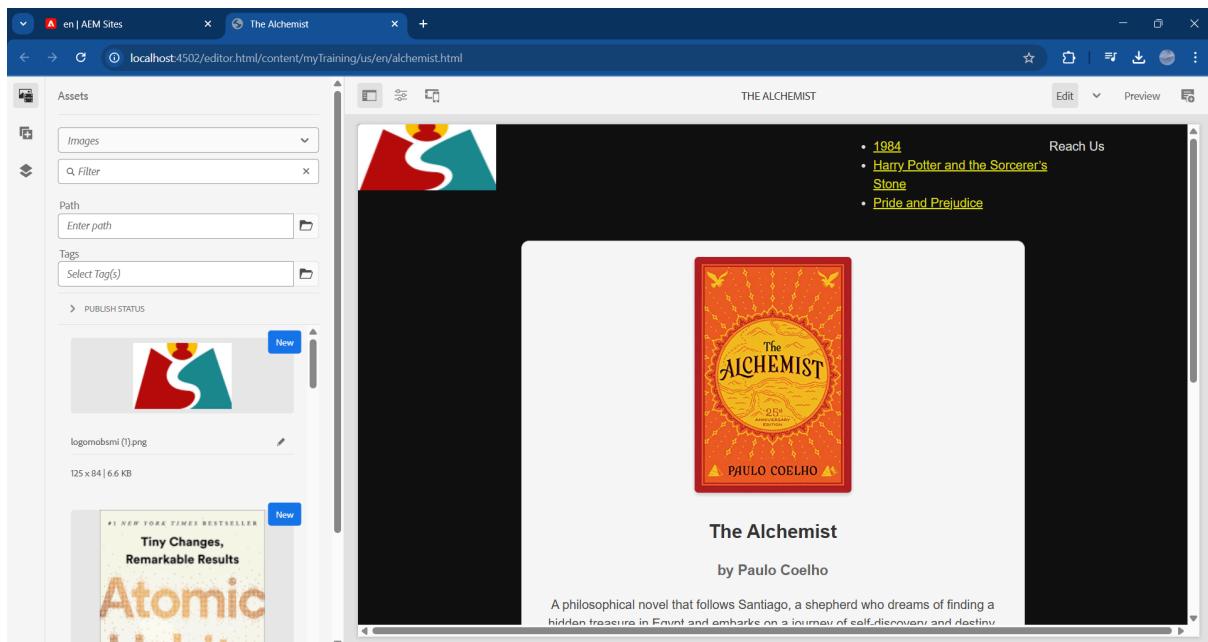

Created 10 pages with that template:

Used the component to add data :

Published

used the same method for all the pages by creating using the templates we made:

A screenshot of a web browser window titled "Harry Potter and the Sorcerer's Stone". The URL is "localhost:4502/content/myTraining/us/en/harry.html". The page features a large image of the book cover for "Harry Potter and the Sorcerer's Stone" by J.K. Rowling. Below the image, the title "Harry Potter and the Sorcerer's Stone" and author "by J.K. Rowling" are displayed. A descriptive text box states: "The first book in the Harry Potter series, following young Harry as he discovers he is a wizard and begins his magical education at Hogwarts." At the top right of the page, there is a "Reach Us" section with links to "1984", "Harry Potter and the Sorcerer's Stone", and "Pride and Prejudice".

A screenshot of a web browser window showing a simplified version of the book page. The layout is identical to the first screenshot, featuring the book cover, title, author, and descriptive text. However, the "Reach Us" section at the top right is missing. Instead, the bottom of the page contains a footer with links to various books and a copyright notice.

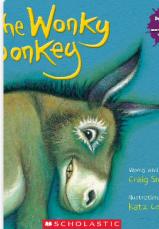

The footer links include:

- [The Alchemist](#)
- [To Kill a Mockingbird](#)
- [1984](#)
- [Harry Potter and the Sorcerer's Stone](#)
